

Comment	Evidence
3 specialists were presented on the book the fear of freedom.	
The three specialists agreed that for them there is no total freedom, that we have partial freedom, that we are free to exist, to be autonomous in all aspects, without ties or pressure and determined by your individual self.	
Each specialist and each student interpreted what the book expresses in different ways, that everyone has their point of view and shares it is very good.	
In the forum there were several participations of the students.	
Some topics were discussed more clearly, such as the psyche, nacism, fascism, existentialism, economic systems, masochism, sadism, etc. from different disciplines.
